Re: Use of Spectrum Bands Above 24 GHz For Mobile Radio Services, GN Docket No. 14-177, IB Docket Nos. 15-256 & 97-95; RM-11664; WT Docket No. 10-112

Dear Ms. Dortch:

On June 1, 2017, Dean Brenner, Alejandro Holcman, and Mustafa Saglam of Qualcomm Incorporated had a teleconference with members of the FCC's Enforcement Bureau listed below. Qualcomm discussed means of identifying base stations used by terrestrial licensees of spectrum bands above 24 GHz. Qualcomm explained that there are commercially available apps that can be used to obtain base station identifiers for 4G services and should also provide base station identifiers for future 5G services.

Respectfully submitted,

John W. Kuzin
